REFERENCE: *Bennachie* - A promotional video of twenty minutes duration.

Dear Mr Stallard

Enclosed please find our quotation for the programme you are commissioning. I also enclose a VHS copy of our Showreel and a copy of our brochure which will give you some information about the Cinécosse team and the range of programmes we have produced in recent times.

Our quotation is based on the treatment you provided.

As you will see in our document, we have provided for one day of aerial and two of ground based shooting - the 'actors', father, son and daughter, would be required on all three days. We would suggest that shooting take place in late May or early June when the weather tends to be fair and sunny for reasonable periods of time. This is also the time when many wildflowers are in bloom and is a reasonable time to expect to see birds and other wild animals.

Wildlife filming is an unpredictable businesses. You may wish to build a contingency figure into your overall project budget against the need for additional filming caused by bad weather or to achieve shots of, otherwise elusive, wildlife by shooting at Kincaig Wildlife Park or elsewhere. Alternatively, library film of wild animals can be acquired. Costs, including copyright charges, vary. We would be happy to discuss contingency provision with you or your project committee.

We believe that maps of the hill will greatly assist the viewer appreciate where they are when detail is being shown in the shape of both aerial and ground based pictures. To that end, there is provision in the budget for computer generation of maps and necessary title and name identification graphics.

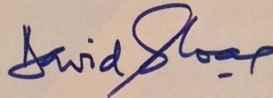

We note that you will supply the Helicopter with camera mounting; a father, son and daughter; and will enlist the services of Bailies and their friends to provide incidental and title music for the production. The budget provides for the recording of such music.

As requested, the budget provides for the supply of 2 Beta SP 625-PAL master copies and 100 VHS 625-PAL copies of the programme.

If you have any queries or would like further information, please don't hesitate to contact me. Indeed should you feel a meeting would be of value, we would be delighted if you would join us at our headquarters in Ellon where you could see our facilities and meet members of the team.

I look forward to hearing from you.

Yours sincerely

David Gloag

Portfolio - 1

Leisure, Recreation and Tourism

CINÉCOSSE was established as a Video, Film and Audio-Visual programme production enterprise in 1978. A permanent staff of eight work in the various disciplines of programme production at the firm's Riversfield studios at Ellon, near Aberdeen.

Three working partners are responsible for **CINÉCOSSE** - and they combine many years experience in broadcast Television and Film production with considerable expertise in sales, marketing and training programmes.

CINÉCOSSE makes a wide range of programmes for business and industry all over the United Kingdom and overseas. These include public relations and information presentations for banks, large corporate groups and public undertakings. Sales and promotional programmes for local authorities; the oil and gas industry; the food, farming and fishing industries, and tourism and leisure related organisations.

Establishing a good working relationship with our clients is a priority - indeed, many of them have been with us since we started business. We are involved continuously throughout a project from initial client enquiry to delivery of a final programme.

CINÉCOSSE undertakes all production and technical work on an 'in-house' basis at Riversfield - having staff and technical facilities permanently available for the execution of a project, often at very short notice. It has a 3-camera studio which is regularly used for the production of corporate staff video magazines and communication training courses, as well as the creation of customised special effects.

Riversfield offers extremely pleasant surroundings for the production of programmes. There are many added facilities within the infrastructure of the day-to-day business of programme production - extensive business support facilities include computer based graphics and desktop publishing, as well as self-contained mini-conference, media training and catering facilities.

All programmes are made to Broadcast standard; 3 and 4-machine video editing to Betacam-SP formats with comprehensive vision-mixing and digital video facilities; sound tracks are created in a separate DAT-equipped studio facility which also undertakes narration recording. We are licensed by the Mechanical Copyright Protection Society to provide music from an extensive library.

The Cinécosse Portfolio - 1

Leisure, Recreation and Tourism

- Ross & Cromarty Tourist Association**
The Ross & Cromarty Story - *Winner of the Gold Camera Award, U.S.20th International Film & Video Festival, Chicago.*
